SPIRIT OF THE MORNING PRESS.

The Union concludes from the comments of the press upon the message, that the country is highly delighted with the manner in which the President gets up his State papers. Commenting on the protest of the Know Nothing council against the edict of their grand council of New York, ordering all the members of the order to be put upon their oath, relative te their vote they gave at the recent Guberna-

torial election in that State, the editor says "We are not surprised at the action of the Grand Council. Our only surprise is, that any considerable number of American-born citizens, living under just and equal laws, and professing to have a higher and holier regard for the country and its free institutions than by any possibility can be possessed by those who labor under the accidental misfortune of foreign birth or foreign parentage, should sursender their consciences, preferences, and actions to the keeping and control of a small body of irresponsible men-in a word, that should become the blind, submissive instruments to fight the quarrels and promote the official aspirations of men unknown to them, or known only for their faithless and unprincipled career as politicians. How humiliating to us, as republicans, is the startling admission in the above preamble, that the attempt was made, by threats and penalties, to compel native-Americans to vote for the candidates -not nominated by the know-nothing party at large, but nominated in secret caucus by in a day, at times. As a general thing, they the no less startling admission that the Grand Council passed a resolution requiring the members of the subordinate lodges "to confess, under oath, under certain pains and penalties, how they voted at the recent election!

"If this is not transferring the sovereign power from the hands of the people into the hands of a secret and irresponsible junta—if it does not destroy at one sweep the inestimable privileges and blessings of the elective franchise-if its object is not the destruction of our liberties as a free and independent nation-we know not the true meaning of words, and are incapable of penetrating the all newspapers sent in the mails, and to make transparent designs of demagogues and tyrants.
"The apprehension expressed in the last

resolution, relative to the future (we suspect the present is intended) material of the Grand Council, is well founded. Such of the knownothing leaders as have shown their hands, and avowed their identity with the new party have generally been recognized by the country as men of no settled political faith, and who have wearied county, State, and national conventions, of all parties and factions, with their long-deferred, and hitherto not properly appreciated, claims for official nominations, or other less equivocal favors."

The Intelligencer's Paris correspondent writing under date of the 21st ult., reviews the operations of the allies up to the 12th ult. concluding that, with their vast expenditure of life and treasure, they have accomplished literally nothing, having done no damage to Sebastopol as yet, which the Russians have not been able to repair in one night. The writer now admits for the first time, that it is very questionable whether the allies will be able to take Sebastapol.

BURNING OF THE PRESTENTIARY AT RICH-MOND. -On Thursday night all the workshops connected with the Richmond (Va.) penitentiary were entirely destroyed by fire, which is supposed to have originated in the machine shop and to have been the work of an incendiary, as the shop contained a large quantity of wool. The loss is estimated at \$50,000. During the conflagration the prisoners, under a strong guard, were released from the main building, which at one time was almost enshrouded by the flames. The penitentiary was destroyed once before-on the 9th of August, 1823.

The Collins steamers are receiving their new metallic "Nest" Life boats. Each ship is to have five, in addition to the old boats, of an average capacity of 80 persons. The first of the "nest" has already been put on the Baltic. In reply to reports to the contrary, the Journal of Commerce is authorized to say

"Captain Luce has no intention of going into any business on shore, and is not aware that the Directors of the Collins line of steamers have formed any determination to to a penny. "exclude from their employ the surviving officers of the Arctic.'

A destructive fire occurred in Baltimore on Saturday evening last, commencing in the tinguished Frenchman to a gentleman in this ject idolism of the Know-Nothing ereed;store of J. McGowan & Sons, on Baltimore street, one door south of Paca street. Knabe & Gaehle, Clarke & Bro., Ruman & Son, Mills & Murray, Mills & Bro., Rathrock and Peacock, Mr. Casper, cedar cooper, Mr. Otler, tin ware manufacturer, and Kahler & Musersmith, were among the sufferers. The loss is estimated at \$200,000.

The Eutaw House was in great danger, and was only saved by the most active and difficult exertions.

HUNT AND LITTELL'S MAGAZINES .- Shillington has received Hunt's Merchant's Magazine, the best commercial record published. and Littell's Living Age, for December. Littell is embellished by a beautiful steel engraving of the "Greek Maid."

INTERESTING MAPS .- Joe Shillington has sent us a physical map of the Crimea with enlarged maps of the seat of war and views of Sebastopol and Balaklava. At this particular time these views are very interesting, and will no doubt command a ready sale.

A municipal election takes place in Boston to-day. There are three candidates for the mayoralty-Upton, Whig; Adams, Democrat; and Smith, present incumbent, Know Nothing.

False Logic. - The Intelligencer's "occasional correspondent," who writes from New York, under date of the 7th inst., says : " Notwithstanding all the President says on the subject, the attack on Greytown is a

thing that cannot be justified. There was a great deal of truth in Napoleon's expression hat 'he who excuses, accases himself,' and the large portion of the message which is devoted to the explanation of the affair is an indirect acknowledgement not only that it required explanation, but also of the weakness

Now, it is well known that every gentleman, of whatever perty, that has been in prominent official position here in the last twenty-five Harper's Ferry, by ARCHIBALD KITZMILLER. | years has been systematically hunted by the Alexandria, Va., by Wm. F. CARNE, No. 60 partisan press all over the country, engaged in publishing falsehoods about his acts and opinions. Each succeeding issue of the New York Herald alone, rarely contains less than a dozen new bare-faced and infamous untruths slandering one or more persons in office here. it matters not which party may be in power If treated with the silent contempt they merit the ery is, they are all true, and that the silence of the accused proves the fact. If, on the other hand, as the President takes occasion to do in the message with reference to the Greytown affair, they are disproved, then the cry is set up that, to explain them away is to admit them. The Intelligencer's correspondent's logic is as weak as Taunton water, truly

Again, the same correspondent says : "If the community at Greytown, as has been so frequently alleged by the defenders of the Administration, were a nest of pirates, and not within the pale of legitimate warfare or consideration, how comes it that the Government of the United States had an official representative there, and that he is going, or has gone, again to reside there?"

Our only wonder is that the editors of the Intelligencer, who know the fact well, did not promptly inform their correspondent that according to the custom of commercial na tions, we send official representatives of thi Government wherever an American ship has occasion to touch. That, indeed, we have one now among the savage pirates of the Fejee

The Rates of Postage.—However desirable it may be to make the compensation received for transporting newspapers in the mails pay for its actual cost to the Post Office Department, as the Postmaster General recommends, (and, newspaper publishers as we are, there is no question in our mind of the propriety of the suggestion,) we fear it is not in Congress to carry it out. Newspapers are terrible things apparently making and unmaking public men the Grand Council! Still more humiliating is are clamorous for mail privileges and extra facilities of all sorts. As far as their own inare, indeed, zealous advocates of the plan of the books of the Departmentment "do everything for everybody" gratis, or For the Customs..... as nearly so as possible. As in nearly every stand ready to raise a great hue and cry against any honorable gentleman who will presume to vote to rate with a postage charge that charge proportionate to the service performed in all cases, (the only real remedy for the evil,) more or less, we fear, will conclude to continue to saddle the cost of the existing favors to the press on the Treasury of the United States. Gentlemen disposed to continue the existing condition of things in this respect, will, probably, be found sufficiently numerous when their votes are added to those who desire to have all the Government's expenses, of whatever kind, defrayed by indirect

> mendations on this head. We confess always to have been opposed to the plan of making the Post Office Department a tax on the Treasury proper, and, therefore, never to have been in favor of the reduction of postage rates to points at which the aggregate of postages collected fail to cover the whole expense of the Department. The penny postage and one rate system answers well enough for England, a thickly populated ter ritory of very small extent when compared with ours. It pays its own way there, and would not have been adopted had not the Government previously become sure that it would soon prove self-supporting.

There are various reforms which, if carried out, would go far indeed towards rendering even our rates of postage self-supporting. We are for demanding prepayment in advance on all letters sent in the mails; for a settlement, dollar for dollar, between the Post Office Department and all other Departments of the Government, for postal services rendered by the former to the latter, and also for rating all newspapers with postage by weight. But all these reforms are not to be hoped for. Yet we trust that the principle of the second-mentioned may be carried out by making a direct appropriation specifying that it is to cover the cost of the postage on the free matter carried in the mails, which is, of course, well known

Most Important Information from Europe The Union's mails brought a letter from a discity, from which we make the following extract, premising it with the assurance that the writer's position and means of knowing the secrets of State affairs in Paris are equal to those of any man in that capital:

"PARIS, Nov. 20, P. M., 1854. "Lord Palmerston and Louis Napoleon have been almost inseparable since the former alighted at the Hotel Windsor. Their interview have resulted in a decision to unfurl the standard of Polish, Hungarian and Italian nationality, if Prussia and Austria hesitate longer to declare unequivocally against the Czar. The probability is that neither the one nor the other will consent to do this; in which

case all Europe will be in arms before Spring. As relates to the American continent, you may be assured that France and England have no intention whatever of attempting to regulate the "Balance of Power" there. It would be a blessing to each if you would nurchase Cuba, and pay for it a fair consideration in cash. All the money in your sub-treasury will be needed on the continent before the restoration of peace. If Spain will not sell. she will find no sympathy on this side of the Atlantic in the existing state of affairs, if you the island. Whatever you may hear to the contrary, America is strong, overwhelmingly dence of that than the revocation of the order for Mr. Soule's expulsion? sphere shine so brightly upon the eastern one as at present."

A Warning to Legislators.-Among the acts of the last session of Congress, was one for the relief of the legal representatives of Samuel Prioleau, deceased, late of Charleston, S. C., authorizing the payment of \$6,928 60 to them, "being in full compensation for property taken from the said Prioleau, at Charleston, for the use of the United States, during the war of the Revolution."

It turned out on full investigation that Prioleau had been paid in full by the Government, under the act of 1795, under which the debt in question had been funded. Mr. Comp. troller Whittlesey found conclusive evidence of the fact, and, of course, took the necessary means to protect the rights of the Government as involved in the case. The heirs of the late Mr. Prioleau, on becoming satisfied that the claim had been adjusted by the Government. at once came forward, we hear, to renounce all claim to the payment which Congress, at its last session, ordered to be made.

Lands in Kansas .- We learn that last night Mr. Ross, a nephew of John Ross, and Judge Hicks, a full blood Cherokee, who is on the bench in the Indian country, and is a man of very decided intelligence, character and erudition, reached Washington, coming as a portion of a delegation sent here by the Cherokees to dispose of to the Government a body of 800,000 acres of land which that nation owns in the territory of Kansas. This land lays far off from the nation's other territory, and we hear is not particularly valuable for agricultural purposes. We presume, however, that before they leave Washington it will be purchased of them by the Indian Department.

Pow-Wow.-Just before we went to press to-day, the House in Committee of the Whole, took up the President's Message; whereupon Mr. Giddings delivered his usual hours' speech against the damnable South. In this case, his text was the President's efforts to obtain Cuba. He talked, of course, about "Spanish slave dealers," and all that sort of thing.

HE public are respectfully informed that Gott's

celebrated full-sized copy, in marble, of the DYING GLADIATOR, the most repowned statue of antiquity which has been handed down to the present time, is now on exhibition on 4% street, near Pennsylvania avenue. This work has been pro nounced a faultless copy of the great original by all artists and connisseurs who have seen it, while it justly ranks as the most perfect pecimen of the soulptor's sublime art ever brought from Europe to N the petition of Mosks a Campel Paying for the extension of a patent granted to them on the America. Indeed, it is the only work of the kind so far exhibite i in this country, calculated to give the beholder who has not been abroad, a just conceptien of the skil of the ancients in designing and executing works of sculpture, in which, it will be recollected, they have never been rivalled by subse Patent Office on Monday the 26th of February 1855, quent generations
